## Research Interests

Two-sided platform markets

Media market competition

Vertical relations

## Publications

- 2023 **Multihoming and market expansion: Effects on media platforms' pricing and content creation incentives** (w./ Øystein Foros). *Economics Letters*, 232(111327).

## Working Papers

- 2020 **A Study in Print: Competition in Prices and Quality Between Newspapers and Magazines**. SNF working paper 10/2020.

## Work in Progress

**Channel Coordination on Exclusive vs. Non-Exclusive Content Under Endogenous Consumer Multihoming** (w./ Malin Arve and Øystein Foros).

*An upstream content creator decides whether to sell their content exclusively to one, or to both, downstream media platforms which compete for consumers. The platforms can choose to price low and attract multihoming among the consumers, or price high and induce singlehoming consumers, i.e. exclusive consumers. We study how the content creator's pricing strategy can shape consumer homing decisions.*

**AI price competition with capacity constraints** (w./ John Sæten Lilletvedt)

*We study the effect of adding capacity constraints to AI pricing algorithms. A common worry following Calvano et al (2020) is that autonomous pricing algorithms set collusive prices. We investigate how whether the equilibrium price paths converge similarly when there are capacity constraints on per-period sales.*
